

Lawn Starter Plus Tree, Shrub, & Bloom with 13% Topcut Earth-Friendly Biosolids 10-20-8 Fertilizer

- Encourages root growth and strength
- Regain 100%® provides advanced continuous protection and stabilized nitrogen for superior greenup and low burn potential
- Use in turfgrass, gardens, and flower beds to make phosphorus available to plants
- Topcut Biosolids add natural slow-release nitrogen with non-staining iron
- Apply at planting for lawn seeding
- May use Spring & Fall for established plant & landscape
- Apply at 4# per 1,000 square feet of lawn
- Spreader chart on every bag

A 50lb. bag treats 12,500 square feet on turfgrass. Garden and flower beds: 5,000 square foot coverage.
A 20lb. bag treats 5,000 square feet on turfgrass. Garden and flower beds: 1,000 square foot coverage.

*Endure uses a uniform particle size for improved spread pattern and coverage. Uniform coverage provides even green color and more effective herbicide control. Spreader charts are on each bag. Turfgrass needs fed every six to eight weeks during the growing season.

*All phosphates have been removed from the Endure maintenance products keeping our environmental concerns in mind. Newly seeded turf should be fertilized with Endure 10-20-8 Starter Plus Earth-Friendly Organics at the time of planting. 10-20-8 Starter Plus can be used anytime a soil test result recommends additional phosphate to improve soil conditions.
