

Weed & Feed Plus 20-0-3 Fertilizer with 100% Regain® Contains Surge® broadleaf weed killer

- Surge® excels as a warm weather weed kill, controlling broadleaf weeds twice as fast as older herbicides
- Regain® provides advanced continuous protection and stabilized nitrogen for superior greenup and low burn potential
- Suppresses yellow nutsedge without burning the grass
- Can re-seed in two weeks
- Apply in Spring to clean up dandelions
- Apply in Fall to kill perennial weeds before winter dormancy
- Superior cool season performance
- Apply at 4# per 1,000 square feet of lawn

A 50lb. bag treats 12,500 square feet on turfgrass.

*Endure uses a uniform particle size for improved spread pattern and coverage. Uniform coverage provides even green color and more effective herbicide control. Turfgrass needs fed every six to eight weeks during the growing season.

*All phosphates have been removed from the Endure maintenance products keeping our environmental concerns in mind. Newly seeded turf should be fertilized with Endure 10-20-8 Starter Plus Earth-Friendly Organics at the time of planting. 10-20-8 Starter Plus can be used anytime a soil test result recommends additional phosphate to improve soil conditions.
