

## Winter Root Builder Plus 25% Earth-Friendly Biosolids 26-0-3 Fertilizer with 50% UFLEXX™

- Contains 1% added iron for dark green grass
- Great spring, summer, and fall fertilizer
- Apply late fall: high nitrogen fertilizer will feed and grow turf roots
- Spoon feeds nitrogen to the turf for up to 10 weeks
- Excellent color for long periods
- Topcut biosolids add natural slow release nitrogen with non-staining iron
- Apply at 4# per 1,000 square feet of lawn
- Spreader charts on every bag

**Endure**

A 50lb. bag treats 12,500 square feet  
A 20lb. bag treats 5,000 square feet

\*Endure uses a uniform particle size for improved spread pattern and coverage. Uniform coverage provides even green color and more effective herbicide control. Spreader charts are on each bag. Turfgrass needs fed every six to eight weeks during the growing season.

\*All phosphates have been removed from the Endure maintenance products keeping our environmental concerns in mind. Newly seeded turf should be fertilized with Endure 10-20-8 Starter Plus Earth-Friendly Organics at the time of planting. 10-20-8 Starter Plus can be used anytime a soil test result recommends additional phosphate to improve soil conditions.
